PROMISING MINES.

Gold Cliff and Adjoining Property in Rich Ore.

Chas. Gaetjens and August Zeller came in yesterday from Pearce, where they have been working on a promising property adjoining the Gold Cliff in which also our townsman, J. N. McDonough, is interested. They brought in some samples from their claims which indeed inspire them with courage. Considerable work has been done on their property, and they are now in a fair way to be rewarded for their energy. To a Prospector reporter Mr. Gaetjens stated that he availed himself of an opportunity to visit the Gold Cliff workings, and verified the reports of rich ore being uncovered on that property. A breast of over 10 feet width of excellent shipping ore is being pushed ahead from which no waste is being hoisted. He watched several experiments of panning small samples of average dirt taken promiscuously from the ore hoisted, and was surprised to see the result of a heavy trail of gold in the pan. Each experiment gave like result. This ore also carries a good percentage of silver. Mr. Gaetjens believes that his claims adjoining will also develop into the same ledge, as the formation and character are the same with work thus far done.

The Discovery Saved his Life.
Mr. G. Caillouette, Druggist, Beaver, Ill., says: "To Dr. King's New Discovery I owe my life. Was taken with La Grippe and tried all the physicians, but of no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I sent for a bottle and began its use and from the first dose began to get better, and after using three bottles was up and about again. It is worth its weight in gold. We won't keep store or house without it." Get a free trial the Tombstone Drug Store.

A big crowd of S. P. officials with two carloads of exploration machinery will arrive from San Francisco to explore the coal fields of Sonora. These coal fields are located twenty miles from Ortiz at San Marcial and La Barranca, eighty-nine miles respectively. There indications of great coal country there and the S. P. will develop it to a finish.—Vidette.

Twenty-seven notices of intention to build railroads were filed with the Territorial secretary during the six months ending September 15th. These properties will be exempt from taxation for fifteen years, as provided by the last legislature. Arizona will certainly see much railroad building the coming year.

Among the numerous persons who have been cured of rheumatism by Chamberlain's Pain Balm, mention should be made of Mrs. Emily Thorne, of Toledo, Wash., who says: "I have never been able to procure any medicine that would relieve me of rheumatism like Chamberlain's Pain Balm. I have also used it for lame back with great success. It is the best liniment I have ever used and I take pleasure in recommending it to my friends." For sale by Druggist.

The biggest washout that has occurred in many years was the one last Tuesday night. Bridges Nos. 147, 149, 150, 152, 153, 154, 156, 167, 158, 160, 162, 174, 186 and other bridges between Calabasas and Sanford are washed out and about 200 piles are gone. There are thirty five big stringers and thirty eight caps out. Over one thousand feet of telegraph line with the poles are gone.—Vidette.

Stamps were put on the market in August, 1847, but were so little used that the government had to pass a law enforcing the prepayment of postage, which went into effect in 1855. Before this action was taken scarcely one letter in a dozen was found with a stamp affixed. Today the postoffices of the country sell 4,000,000 stamps (counting postal cards, stamped envelopes and stamps of all kinds) valued at \$75,000,000 during a single year.

There is a man in this town who is going to become entangled with the United States. It is said that for more than a year he has levied a tribute upon ignorant Mexican woodcutters, representing to them that he was an officer of the government authorized to collect a dollar apiece for each wagon load of wood cut on government land and \$5 on each carload. The Mexicans have been complaining of the hardship imposed upon them, but until lately their complaints have been made to persons who took no interest in them. The matter will be investigated.—Republican.

NEW CYANIDE PROCESS.

A Combination of Cyanides Expedites Operation.

The following is from the Mining and Scientific Press, San Francisco: "Dr. Keith, formerly of this city, now of London, claims to have invented a cyanide process in which the dissolving process he adds to the solution of potassium cyanide a certain quantity of cyanide of mercury. He states that he finds the best results obtained when the solvent contains 0.05 per cent of potassium cyanide and 0.025 per cent of cyanide of mercury. This mixture of cyanides, he claims, operates faster than the simple potassium cyanide. The process for the recovery of the gold from the solution is an electrolytic one. The gold and the mercury are deposited together upon amalgamated copper plates. The amalgam so deposited is scraped off and the gold recovered by distilling off the mercury in the usual way. The anode is not allowed to dip in the cyanide solution, but is placed in a separate compartment and surrounded with a solution of an alkaline salt, so that the cyanide does not become decomposed. The electromotive force of the current need not be more than half a volt, and the current density on the depositing surface may be as low as 0.56 amperes per square foot."

FOR OVER FIFTY YEARS.
An old, well-tried remedy, Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for diarrhoea. It is pleasant to the taste. Sold by druggist in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.

COUNTY RECORDS.

HOMESTEAD.

Notice filed by J. H. Moore.

DEED.

T. H. Reynolds to E. R. Hooker, mines, \$1.

Van Ella May to Lyda J. Hudson, real estate, Wilcox, \$1,000.

J. H. Moore to M. Scanton, ranch, \$200.

LOCATION.

Last Chance mine, by John Miller and H. C. Hooker.

AGREEMENT.

Between P. H. Clark with J. E. Butler and others, Little Jessie mine.

Teela believes that mountains can be radiographed by the X rays and gold located without the trouble of excavation; that such mining is possible, though as yet only to a limited extent. He says that Reentgen rays "are without limit as to length and radiography. They are limited now because of one almost toy apparatus for producing them." He thinks that as it is only a question of tubes and currents, at any moment a way may be found for producing rays that will penetrate hills and mountains, perhaps the earth itself. A noted metallurgist has a radiograph of quartz with gold embedded in the center and concealed from the naked eye. He believes that much labor can be saved and a great deal more gold mined by this means.

Mr. Isaac Horner, proprietor of the Burton House, Burton, W. Va., and one of the most widely known men in the state was cured of rheumatism after three years of suffering. He says: "I have not sufficient command of language to convey any idea of what I suffered, my physicians told me that nothing could be done for me; and my friends were fully convinced that nothing but death would relieve me of my suffering. In June 1894, Mr. Evans, then salesman for the Wheeling Drug Co., recommended Chamberlain's Pain Balm. At this time my foot and limb were swollen to more than double their normal size and it seemed to me my leg would burst, but soon after I began using the Pain Balm, the swelling began to decrease, the pain to leave, and now I consider that I am entirely cured. For sale by all dealers in Tombstone and Bisbee.

No "Poison in the Teapot"

if its Pride of Japan (Tree) Tea that's brewing there.

Here's what Thomas Price & Son, the San Francisco chemists, say:

"We have made a searching chemical examination of Pride of Japan Tea and find it to be free from all mineral and organic adulterations, constituting a perfectly pure tea."

BRYAN SAYS

It Is Spasmodic and Is Not Due to Legislation.

Bryan in reply writes to the St. Louis Post-Dispatch:

"Wheat has risen because the foreign crop has been exceedingly short."

"The fact that silver and wheat have parted company will cause no dismay to those who understand that the law of supply and demand regulates the price of both."

"Nothing can better disclose the weakness of the Republican position than the joy manifested by the Republicans over events for which their administration and their policies are in no wise responsible."

"If the Republicans desire to claim credit for the high price of wheat they must assume the responsibility for the famine in India."

"A general rise in prices should be followed by a rise in wages."

Mr. Bryan says that the joy over the increase of money from wheat is evidence that we have too little money; that if the farmers are benefited by the rise in one of their products how much better would it be if the rise was universal; that the price of wheat will fall when the foreign demand becomes normal, and that the present spasmodic rise will aid rather than injure the cause of bimetalism.

Everybody Says So.

Cascarets Candy Cathartic, the most wonderful medical discovery of the age, pleasant and refreshing to the taste, act gently and positively on kidneys, liver and bowels, cleansing the entire system, dispel colds, cure headache, fever, habitual constipation and biliousness. Please buy and try a box of C. C. C. today, 10, 25, 50 cents. Sold and guaranteed to cure by all druggists.

Educate Your Bowels with Cascarets.

Candy Cathartic, cure constipation forever. 10c, 25c, 50c. H. C. C. Co., druggists refund money.

Poor Blood

is starved blood. It shows itself in pale cheeks, white lips, weak digestion, no appetite, exhaustion, lack of nerve force, soft muscles, and, chief of all, weak muscles. Your doctor calls it Anaemia. He will tell you that the weakening weather of summer often brings it on.

Scott's Emulsion

of Cod-liver Oil with Hypophosphites, will make poor blood rich. It is a food for over-taxed and weak digestion, so prepared that it can easily be taken in summer when Cod-liver Oil or even ordinary foods might repel.
